

Licensing WinZip software is an affordable way to equip your organization with the world's leading solution for compression, secure sharing and data backup. Adding Maintenance to your licenses ensures your software stays up to date with free regular updates to the latest technology, encryption and security standards while reducing your licensing costs over time.

Get More with WinZip Maintenance

WinZip Maintenance goes beyond licensing to offer customers many additional benefits, including:

Always up-to-date software

- Get the latest version automatically (while your Maintenance is active) including a full version every year and a mid-cycle release

Easier purchasing and planning

- Tight budgets mean it's not always easy to get a software P.O. approved. Buying Maintenance is a simple way to stay current without going through a difficult purchasing approval process
- Add additional licenses to the original registration file instead of getting a new registration file each time you buy licenses
- Make your software expenses more predictable, so budgeting is easier

Significant savings

- Receive all future releases of the covered WinZip product for a small annual fee - less than half the cost of an annual upgrade
- Enjoy a 5% discount if your organization purchases a 2- or 3-year Maintenance program
- Add additional licenses at the same tier level as your original purchase. For example, if you purchased 1,500 licenses with Maintenance and you want to add 100 more, you pay the same price (requires a minimum order of 2 licenses)
- Add WinZip Mac Edition licenses to your PC environment at the 'add-on' price

Guaranteed compliance

- Stay in compliance and avoid the problems and costs that come with using unlicensed software

More service and support

- Get 24-hour Priority email support
- Designate two technical coordinators who can contact WinZip Computing for telephone support when you purchase more than 500 copies

Do you have active Maintenance?

We highly recommend transitioning to Enterprise since you're eligible for special pricing. For more information, contact your sales rep at enterprise@winzip.com.

How to Buy Maintenance

Maintenance can only be purchased when you purchase a license or upgrade for a WinZip product. It can be renewed annually provided you do not let it expire. The number of copies of the customer's first WinZip license determines the associated pricing tier.

About WinZip Licensing

Licensing starts at the 2-unit level with additional discounts starting at just 10 licenses. In addition, our licensing program offers high flexibility with no ongoing purchasing commitment. Users of previous versions of WinZip can upgrade their licenses to the most recent version at 50% of new license pricing.

What information should I provide with my order?

As per all license orders, you will need to provide the following information:

- End user company name
- End user address & telephone details
- End user contact name & contact details
- End user contact email address (for fulfillment)
- CRM record number – required for all orders that are either upgrades, additional licenses or Maintenance renewals/add-ons (found on the original fulfillment email)

Where can I get more information/assistance?
